The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 21-22, 24-33, 37 and 38 are rejected under 35 U.S.C. 102(b) as being anticipated by Katayama et al EP 034492.

See example 1: 33% insecticide, 5% Calcium silicate (from Table 1 – maintains insecticide better than most) 5% surfactant, and balance of solid inert carrier – Tokusil and Kaolinite clays.

See example 5 – specifically uses 1-10% calcium silicate.

Table 4 shows 3% calcium silicate. There is no film formation; the inhibitors can be considered to be 1-10% of calcium carbonate or disodium hydrogen phosphate; example 5. Intended use against crawling insects is not considered as of patentable weight for the composition, but the insecticides used are known for that purpose (p. 3-8).

Applicant's arguments with respect to claims 21-38 is have been considered but are moot in view of the new ground(s) of rejection.
